Images Direct to your Computer in seconds

Our Flat Panel digital technology delivers images in seconds, and offers lower exposure time than traditional film systems. With the Image Evaluation software, you can adjust images and diagnose immediately to inform clients in real time.

SingleTouch Monitor System

If you purchase a complete new system or upgrade from a VetRay (Sedecal) film x-ray machine, you will receive the benefit of our SingleTouch Monitor. The Single Touch Monitor is the only monitor needed in the x-ray room. Learn more at www.VetRay.com

4-way float top table

A 5 foot 4 way float top allows for easy positioning of the patient. Designed specifically for veterinarians it has a longitudinal float of 22 inches and a cross table float of 7 inches. A 6 foot table top is also available if needed.

High Frequency Generator

HF - 32 kW, 400 mA, 125 kVp, 500 mAs single or three phase operation. Generator fits inside table to optimize space in x-ray room.

Hands Free Collimator Light Control

Allows operator to keep hands on patient for convenient positioning.

We are the Manufacturer

The VetRay line of x-ray solutions is created by the world's leading x-ray manufacturer, Sedecal. Our team of experts and remote support staff are always on duty to assist you.
