

Viztek Opal CR System

Viztek Opal-CR is the fast and easy way to convert your facility to digital today! The easy-to-use tabletop CR can produce 56 plates per hour while offering crisp image quality. Reading images at 10 pixels/mm, the compact CR can be used in any environment, including mobile units. Viztek Opal CR is the fastest way to take existing analog imaging into the digital realm. Additionally, the CR also offers significant speed and image quality over analog film processing.
